CONTENTS

Section (A)

Computer Awareness 1–16

Section (B)

— Structure of Animal and Plant Cells 3–3
— Typical Plant Cell 4–7
— Classified Variety of Life 8–39
— Biological Importance of Water (1) & (2) 40–43
— Osmosis 44–46
— Structure of Plasma Membrane 47–50
— Cell Membrane System 51–54
— Structure of Prokaryotic Cell 55–57
— Structure and Function of Lipids 58–60
— Polysaccharides 61–65
— Levels of Protein Structure 66–70
— Functions of Protein 71–72
— Testing for Biochemicals 73–75
— Catalysis by Enzymes 76–78
— Factors Affecting Enzymes Activity 79–82
— Metabolic Pathway 83–85
— Utility of Enzymes 86–87
— Glycolysis 88–91
— Krebs Cycles 92–94
— Cellular Respiration 95–96
— Nucleic Acid : DNA 97–100
— Nucleic Acid : RNA 101–104
— Light Reaction : Non-Cyclic Photophosphorylation 105–107
— Dark Reaction : Calvin Cycle 108–110
— Chloroplasts : Absorption and Action Spectra of Chlorophyll 111–113
— Translocation by Phloem 114–115
— Water Potential 116–117
— Water Relationship of Plant Cells 118–120
— Stomata 121–123
— Cohesion-Tension Theory of Transpiration 124–126
— Plant Growth Hormones 127–135
— Pollination 136–138
— The Seed and Germination 139–141
— Ecology 142–145
— Energy Flow through an Ecosystem-I & II 146–150
— Ecological Pyramids 151–153
— Succession in Plants 154–156
— The Carbon Cycle 157–159
— Nitrogen Cycle 160–163
— Greenhouse Effect 164–166
— Acid Rain 167–168

— Ozone 169–171
— Deforestation 172–174
— River Pollution 175–176
— Ideal Human Diet 177–181
— Mammalian Respiration 182–184
— Structure and Function of Lung 185–188
— Pulmonary Ventilation 189–191
— Spirometer : Measurement of Respiratory Activity 192–194
— Tissue Fluid 195–197
— Transport of CO_2 from Tissue to Lung 198–200
— Hormones of Pancreas 201–203
— Ectotherms 204–207
— Immune Response I : Cells 208–211
— Immune Response II : Antibodies and Immunity 212–214
— System of Endocrine Control 215–218
— Endocrine System in Humans 219–223
— Action Potential 224–226
— Structure and Function of Synapse 227–230
— Human Male Reproductive System 231–233
— Human Spermatozoon and Ovum 234–236
— Human Female Reproductive System 237–240
— Menstrual Cycle 241–243
— Functions of Placenta 244–245
— Replication of DNA and Structure of Chromosome 246–249
— Gene Control 250–253
— Translation of *m*RNA 254–256
— Mitosis and Growth 257–260
— Meiosis and Variation 261–264
— Gene Mutation and Sickle Cell Anemia 265–267
— Chromosomal Mutation 268–270
— Monohybrid Inheritance 271–273
— Linkage between Genes 274–277
— Dihybrid Inheritance 278–281
— Variation 282–285
— Natural Selection 286–290
— Artificial Selection 291–294
— Reproductive Isolation and Speciation 295–299
— Biodiversity, Conservation and Cryopreservation 300–308
