
Contents

● Previous Year's Solved Paper	
● General Information	2–14
List of the Atomic Masses of the Elements	2
Electrochemical Series	3
Prefix for SI Units	3
Important Constant	4
Conversion Factors	4
Important Compounds and their Formulae	4
Some Eminent Chemists and their Discoveries	7
Some Important alloys, their Compositions and Uses	9
Important Ores	10
Some Common Bond Lengths	11
Hardness of Minerals	12
Different Absorbent	12
Name of Some Important Acids and their Salts	12
Nobel Prize Winners : Chemistry	13

PHYSICAL CHEMISTRY

1. Structure of Atom	16–24
2. Chemical Bond	25–32
3. Solutions	33–41
4. Solid State	42–46
5. Nuclear Chemistry	47–54
6. Chemical Equilibrium	55–61
7. Ionic Equilibrium	62–69
8. Thermodynamics and Thermochemistry	70–75
9. Chemical Kinetics	76–81
10. Electro Chemistry	82–89
11. Surface Chemistry	90–94

INORGANIC CHEMISTRY

12. Principles of Metallurgical Operations	97–100
13. Chemical Periodicity	101–104

14. Comparative Study of Elements (Hydrogen and Alkali Metals)	105–119
15. Transition elements (<i>d</i> -Block elements)	120–124
16. Co-ordination Compounds	125–128
17. Chemical Analysis	129–134

ORGANIC CHEMISTRY

18. General Organic Chemistry	136–148
19. Alkanes, Alkenes, Alkynes, Petroleum and Benzene	149–157
20. Halogen Compounds, Alcohols and Phenols	158–165
21. Carbonyl Compounds, Carboxylic Acids and Amines	166–176
22. Polymers	177–180
23. Bio-molecules	181–185
● Some Miscellaneous Facts	186–188
