

Contents

● Previous Year's Solved Paper

PHYSICS

● General Information 3–9

UNIT-1 General Physics 10–24

- I. Units and Dimensions 10
- II. Motion in Two Dimensions 11
- III. Motion in a Straight Line 13
- IV. Uniform Circular Motion and Projectile Motion 14
- V. Newton's Laws of Motion 16
- VI. Work, Power and Energy 18
- VII. Rotatory Motion of Rigid Bodies 18
- VIII. Universal Gravitation 20
- IX. General Properties of Matter 21

UNIT-2 Heat 25–26

- I. Isothermal and Adiabatic Processes 25
- II. Transmission of Heat 26

UNIT-3 Vibrations, Waves and Sound 27–31

- I. Simple Harmonic Motion 27
- II. Wave Motion 28
- III. Principle of Superposition 29
- IV. Doppler's Effect 30

UNIT-4 Light 32–38

- I. Wave Nature of Light 32
- II. Reflection and Refraction of Light on Spherical Surfaces 34
- III. Optical Instruments and Defects of Vision 37

UNIT-5 Electricity and Magnetism 39–52

- I. Electric Field and Potential 39
- II. Capacitor 41
- III. Electrical Conduction 42
- IV. Simple Circuit 44
- V. Electromagnetism 45
- VI. Magnetism 46
- VII. Electromagnetic Induction 49
- VIII. Alternating Current 50

UNIT-6 Modern Physics 53–61

- I. Cathode Rays and Photoelectric Effect 53

- II. Atomic Model and Hydrogen Spectrum 54
- III. Nuclear Structure 57
- IV. Radioactivity 58
- V. X-Rays 59
- VI. Semi-conducting Devices 60

UNIT-7 Our Universe 62–64

● Objective Questions 65–282

- UNIT-1 General Physics 67–138
- UNIT-2 Heat 139–153
- UNIT-3 Vibrations, Waves and Sound 154–178
- UNIT-4 Light 179–212
- UNIT-5 Electricity and Magnetism 213–254
- UNIT-6 Modern Physics 255–281
- UNIT-7 Our Universe 282–282

CHEMISTRY

● General Information 2–14

- List of the Atomic Masses of the Elements 2
- Electrochemical Series 3
- Prefix for SI Units 3
- Important Constant 4
- Conversion Factors 4
- Important Compounds and their Formulae 4
- Some Eminent Chemists and their Discoveries 7
- Some Important alloys, their Compositions and Uses 9
- Important Ores 10
- Some Common Bond Lengths 11
- Hardness of Minerals 12
- Different Absorbent 12
- Name of Some Important Acids and their Salts 12
- Nobel Prize Winners : Chemistry 13

PHYSICAL CHEMISTRY

- 1. Structure of Atom 16–24
- 2. Chemical Bond 25–32
- 3. Solutions 33–41
- 4. Solid State 42–46
- 5. Nuclear Chemistry 47–54
- 6. Chemical Equilibrium 55–61
- 7. Ionic Equilibrium 62–69
- 8. Thermodynamics and Thermochemistry 70–75

9. Chemical Kinetics	76–81	2.3. General Solutions of Trigonometrical Equations	61
10. Electro Chemistry	82–89	2.4. Relation between the Sides and Angles of a Triangle	65
11. Surface Chemistry	90–94	2.5. Inverse Trigonometrical Functions	70
INORGANIC CHEMISTRY		2.6. Height and Distance	75
12. Principles of Metallurgical Operations	97–100	3. Co-ordinate Geometry	83–123
13. Chemical Periodicity	101–104	3.1. Co-ordinate Geometry of Two Dimensions Rectangular Cartesian Co-ordinates and Straight Lines	83
14. Comparative Study of Elements (Hydrogen and Alkali Metals)	105–119	3.2. Pair of Straight Lines	92
15. Transition elements (<i>d</i> -Block elements)	120–124	3.3. Circle	99
16. Co-ordination Compounds	125–128	3.4. Parabola	109
17. Chemical Analysis	129–134	3.5. Ellipse	114
ORGANIC CHEMISTRY		3.6. Hyperbola	119
18. General Organic Chemistry	136–148	4. Co-ordinate Geometry of Three Dimensions	124–138
19. Alkanes, Alkenes, Alkynes, Petroleum and Benzene	149–157	5. Vector Algebra	139–149
20. Halogen Compounds, Alcohols and Phenols	158–165	6. Differential Calculus	150–172
21. Carbonyl Compounds, Carboxylic Acids and Amines	166–176	6.1. Function, Limit, Continuity and Differentiability	150
22. Polymers	177–180	6.2. Differentiation	157
23. Bio-molecules	181–185	6.3. Maxima, Minima, Increasing and Decreasing Functions	164
● Some Miscellaneous Facts	186–188	6.4. Rolle's Theorem and Mean Value Theorem	169
<u>MATHEMATICS</u>		7. Integral Calculus	173–189
1. Algebra	3–48	7.1. Indefinite Integration	173
1.1. Complex Numbers	3	7.2. Definite Integral	182
1.2. Arithmetic, Geometric and Harmonic Progressions	8	7.3. Areas under Simple Curves	187
1.3. Theory of Equation	15	8. Differential Equations	190–204
1.4. Permutation and Combination	21	8.1. Formation of Differential Equations	190
1.5. Binomial Theorem	26	8.2. Order and Degree of Differential Equation	193
1.6. Exponential Series	30	8.3. Solution of Differential Equations by Separation of Variables Method	195
1.7. Logarithmic Series	33	8.4. Homogeneous Form of Differential Equations	199
1.8. Determinants	35	8.5. Differential Equations of First Order	201
1.9. Matrix	41	9. Statistics	205–214
2. Trigonometry	49–82	9.1. Probability	205
2.1. Trigonometrical Functions and their Graphs	49	9.2. Correlation and Regression	212
2.2. Trigonometrical Ratios and Identities	50	10. Numerical Methods	215–222
		11. Linear Programming	223–228
