## CONTENTS

---

1. Set Theory, Relation, Mapping and Number System	3–6	27. The Cone	176–182
2. Linear Algebra	7–13	28. Asymptotes, Curvature and Curve Tracing	183–192
3. Surds, Indices and Factors	14–20	29. The Cylinder	193–198
4. Group Theory	21–30	30. Differentiation	199–201
5. Simultaneous Quadratic Equations	31–34	31. Functions and Limits	202–209
6. Progressions (A.P., G.P. and H.P.)	35–42	32. Continuity and Differentiability	210–213
7. Permutations and Combinations	43–49	33. Application of Derivatives	214–217
8. Logarithm	50–54	34. Maxima and Minima	218–226
9. H.C.F. and L.C.M. of Numbers	55–59	35. Definite Integrals	227–231
10. Binomial Theorem	60–65	36. Indefinite Integrals	232–234
11. Probability	66–72	37. Area of Bounded Regions	235–238
12. Matrices and Determinants	73–82	38. Differential Equation	239–245
13. Trigonometrical Identities	83–87	39. Partial Differentiation	246–251
14. Trigonometric Equations	88–93	40. Vector Analysis	252–261
15. Solution of Triangle	94–98	41. Velocity, Acceleration and Rectilinear Motion	262–275
16. Properties of Triangle	99–105	42. Relative Motions and Its Simple Applications	276–280
17. Heights and Distances	106–117	43. Motion Under Gravity, Projectiles	281–292
18. Complex Number and De Moivres Theorem	118–124	44. Laws of Motion	293–297
19. Three Dimensional Coordinate Geometry	125–130	45. Impulse, Work, Power and Energy	298–305
20. The Straight Line	131–137	46. Resultant of Coplanar Force	306–311
21. Parabola	138–142	47. Equilibrium of Three Forces Acting on a Particle	312–318
22. Hyperbola	143–148	48. Moments and Couples	319–325
23. Ellipse	149–154	49. Equilibrium of Three Forces Acting on by a Rigid Body	326–336
24. The Circle	155–160	50. General Conditions of Equilibrium	337–340
25. Tangents and Normals	161–169		
26. The Sphere	170–175
