## **Contents**

<ul><li>Mathematical Symbols</li></ul>		3–4	<ul><li>Mensuration</li></ul>			41–53
• Gre	Greek Alphabets			1.	Area and Perimeter	43
• Ro	Roman Numerals			2.	Volume and Surface Area	46
• Ar	Arithmetic			3.	Sphere	49
1.	Natural Numbers	9		4.	Right Circular Cylinder	51
2.	LCM and HCF of Numbers	12		5.	Cone	52
3.	Percentage	13		6.	Pyramid	53
4.	Simple and Compound Interest	14	•	Pla	ne Trigonometry	55-63
5.	Square and Cube Root	16		1.	Trigonometry	57
6.	Surds and Indices	18	•	Alg	gebra	65–94
7.	Logarithms	19		1.	Elements of Set Theory	67
8.	Ratio and Proportion	20		2.	Relation and Function	69
9.	Average	22		3.	Number Theory	71
10.	Trains	23		4.	Equations and Inequalities	80
11.	Ages	24		5.	Quadratic Equation	81
12.	Time and Distance	25		6.	Mathematical Induction	82
13.	Boat and Stream	26		7.	Permutation and Combination	83
14.	Time and Work	27		8.	Binomial Theorem	85
15.	Discount and Stock	29		9.	Exponential and Logarithmic	
16.	Partnership	30			Series	86
<ul> <li>Plane Geometry</li> </ul>		31–39	1	0.	Polynomials, Division and	00
1.	Triangle	33		1	Algorithm	89
2.	Similar and Congruence of		1	1.	Theory of Equations	91
	Triangles	34	•	An		95–127
3.	Quadrilaterals	35		1.	Fundamental Concepts of 2D	97
4.	Circles	36		2.	Straight Line	99
5.	Polygon	39		3.	Pair of Straight Lines	102

	4.	Circle	103	4.	Multiple Integration		205
	5.	Parabola	107	Di	fferential Equations	207	-222
	6.	Ellipse	111	1.	Differential Equation		209
	7.	Hyperbola	116	2.	Ordinary Differential Equat	ion	214
	8.	Conic Section	121	3.	Partial Differential Equation		218
	9.	Polar Equations	124		atrices		-235
•	An	alytic Solid Geometry	129–146		Matrices and its Types	220	225
	1.	Fundamental Concepts of 31	D 131	2.	Determinant		230
	2.	Plane	134		Operations with Matrices		233
	3.	Straight Line	136		-	227	
	4.	Sphere	139		ostract Algebra	231	-257
	5.	Cone	142	1.	1	Eiald	239
	6.	Cylinder	145	2.	Ring, Integral Domain and	rieiu	247
•	Sec	quences and Series	147–153	3.	Vector Spaces		251
	1.	Sequences	149		Linear Transformations		255
	2.	Series	152	Ve	ector Analysis	259	-270
•	Dif	ferential Calculus	155–191		Vector Analysis		261
	1.	Function	157		atics	271	<b>-28</b> 2
	2.	Limit, Continuity and			Force	2/1	273
	_	Differentiability	161	2.	Friction		277
	3.	Rolle's Mean Value and Tay Theorem	lor's 166	3.			279
	4.	Rate of Change	169 •	Dy	vnamics	283	-302
	5.	Tangent and Normals	170	1.	Motion of a Particle in a Str	aight	
	6.	Maxima and Minima	175		Line		285
	7.	Curvature	177		Newton's Laws of Motion		288
	8.	Asymptotes	180	3.	Motion in a Plane		290
	9.	Singular Points	183	4.	Projectiles		292
	10.	Curve Tracing	186	5.	Simple Harmonic Motion		294
	11.	Partial Differentiation	190	6.	Circular Motion		296
•	Int	egral Calculus	193–206	7.	Motion Under Central Force	es	300
	1.	Indefinite Integrals	195	Co	omplex Analysis	303	-312
	2.	Definite Integrals	199	1.	Complex Analysis		305
	3.	Rectification, Quadrature, V	olume	Νι	ımerical Analysis	313	-323
		and Surfaces	201	1.	Numerical Analysis		315

(vii)

•	Integral Transform	325–333	Discrete and Computer Mathema	tics
	1. Integral Transform	327	359	9–377
•	<b>Calculus of Variations</b>	335-340	1. Discrete Mathematics	361
	1. Calculus of Variations	337	2. Computer Mathematics	370
•	Statistics	341-347	1	
	1. Statistics	343	• Operations Research 379	9_399
•	<b>Probability Theory</b>	349–358	1. Operations Research Models	381
	1. Probability Theory	351	2. Linear Programming Problems	396
