CONTENTS

Previous year paper Fully Solved				
	ALGEBRA		DIFFERENTIAL EQUATION	ON
1	Elements of Set Theory	5 12	1. Differential Equations	550-610
1. 2.	Elements of Set Theory Relation and Function	5–13 14–20	GEOMETRY	
3.	Number Theory	21–50		(11 (1)
4.	, ,	51–56	Section (I): Analytic Plane Geometry	617–624
5.	Theory of Equations	57–90	 Fundamental Concepts of 2D Straight Lines 	625–640
6.	Group	91–116	3. Pair of Straight Lines	641–649
7.	Ring, Integral Domain and Field	117–141	4. The Circle	650–668
MATRICES & VECTOR SPACES		5. The Parabola	669–682	
			6. The Ellipse	683-701
Section	on (I) : Matrices		7. The Hyperbola	702-718
	Matrices (A)	142–153	8. Polar Equations	719–744
	Matrices (B)	154–163	Section (II): Analytic Solid Geometry	
3.	Matrices (C)	164–177	9. Fundamental Concepts of 3D	745–757
4.	Matrices (D)	178–204	10. The Plane	758–768
Section	on (II) : Vector Spaces		11. The Straight Line	769–784
5.	Vector Spaces	205–215	12. The Sphere	785–799
6.	Linear Transformations	216–223	13. The Cone	800-810
			14. The Cylinder	811–824
CALCULUS			VECTORS	
Section	on (I) : Differential Calculus		1. Vectors	825-871
1.	Function	224–235	MECHANICS	
2.	Limit, Continuity and		Section (I): Statics	
_	Differentiability	236–272	1. Parallelogram of Forces,	
3.	Rolle's Theorem, Mean Value		Equilibrium of Coplanar Forces,	
	Theorem, Taylor's Theorem	273–286	Moments and Couples	872-891
4.	Rates of Change	287–290	2. Friction	892-898
5.	Tangents and Normals	291–308	3. Centre of Gravity and Centre of	
6.	Maxima and Minima	309–322	Mass	899–911
7. 8.		323–335 336–350	Section (II): Dynamics	
o. 9.	Asymptotes Singular Points	351–365	4. Motion of a Particle in a Straight	012 026
10.	Curve Tracing	366–381	Line	912–926
11.	Partial Differentiation	382–414	5. Newton's Laws of Motion	927–935
			6. Motion in a Plane7. Projectiles	936–944 945–954
12.	on (II): Sequences and Series Sequences	415–419	8. Simple Harmonic Motion	955–960
13.	Series	420–450	9. Circular Motion	961–972
		420-430	10. Motion under Central Forces	973–978
	on (III) : Integral Calculus		Miscellaneous Exercise	
14.	2	451–475	(Vector, Mechanics)	979–993
15.	Definite Integrals	476–498	ELEMENTS OF	
16.	Rectification, Quadrature,	400 505	COMPUTER PROGRAMM	ING
17	Volume and Surfaces	499–525		
17.	Multiple Integration	526–549	1. Number System	994–1008
