CONTENTS

Previous Year Paper Fully Solved			
	ALGEBRA		DIFFERENTIAL EQUATION
1	Elements of Sat Theory	5 12	1. Differential Equations 550–610
1. 2.	Elements of Set Theory Relation and Function	5–13 14–20	GEOMETRY
3. 4.	Number Theory Polynomials, Division Algorithm	21–50 51–56	Section (I): Analytic Plane Geometry 611-616
4. 5.	Theory of Equations	51–30 57–90	1. Fundamental Concepts of 2D 617–624
6.	Group	91–116	2. Straight Lines 625–640
7.	Ring, Integral Domain and Field	117–141	3. Pair of Straight Lines 641–649
7.	King, integral Domain and Field	117-141	4. The Circle 650–668
M	ATRICES & VECTOR SPA	ACES	5. The Parabola 669–682
C42	(T) - M-4		6. The Ellipse 683–701
	on (I): Matrices	1.40 1.50	7. The Hyperbola 702–718
1.	Matrices (A)	142–153	8. Polar Equations 719–744
2.	Matrices (B)	154–163	Section (II): Analytic Solid Geometry
	Matrices (C)	164–177	9. Fundamental Concepts of 3D 745–757
	Matrices (D)	178–204	10. The Plane 758–768
Section	on (II) : Vector Spaces		11. The Straight Line 769–784
5.	Vector Spaces	205–215	12. The Sphere 785–799
6.	Linear Transformations	216–223	13. The Cone 800–810
	CALCUITIC		14. The Cylinder 811–824
	CALCULUS		VECTORS
Section	on (I) : Differential Calculus		1. Vectors 825–871
1.	Function	224-235	MECHANICS
2.	Limit, Continuity and		
	Differentiability	236–272	Section (I): Statics 1. Parallelogram of Forces,
3.	Rolle's Theorem, Mean Value		Equilibrium of Coplanar Forces,
	Theorem, Taylor's Theorem	273-286	Moments and Couples 872–891
4.	Rates of Change	287-290	2. Friction 892–898
5.	Tangents and Normals	291-308	3. Centre of Gravity and Centre of
6.	Maxima and Minima	309-322	Mass 899–911
7.	Curvature	323–335	Section (II): Dynamics
8.	Asymptotes	336–350	4. Motion of a Particle in a Straight
9.	Singular Points	351–365	Line 912–926
10.	Curve Tracing	366–381	5. Newton's Laws of Motion 927–935
11.	Partial Differentiation	382–414	6. Motion in a Plane 936–944
Section	on (II): Sequences and Series		7. Projectiles 945–954
12.	Sequences	415-419	8. Simple Harmonic Motion 955–960
13.	Series	420-450	9. Circular Motion 961–972
Section	on (III) : Integral Calculus		10. Motion under Central Forces 973–978
14.	Indefinite Integrals	451–475	Miscellaneous Exercise
15.	Definite Integrals	476–498	(Vector, Mechanics) 979–993
15. 16.	Rectification, Quadrature,	+/U=+70	ELEMENTS OF
10.	Volume and Surfaces	400 525	COMPUTER PROGRAMMING
17.	Multiple Integration	499–525 526–549	1. Number System 994–1008
	-T	2.2	, 25 L 1000
